**Tree Plantation Program**

Organized by

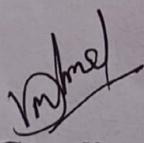

**Environment Awareness Committee**

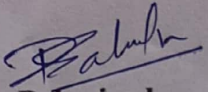

**Objectives:**

- Environmental protection: Tree plantation programs can help save the environment by reducing pollution, maintaining a clear environment, and restoring native forests
- Climate change: Trees can help curb climate change by removing carbon from the atmosphere.
- Water supply: Trees can help protect water supplies by restoring native forests.
- Air quality: Trees can filter clean air.
- Scenic beauty: Trees can beautify areas.
- Soil erosion: Trees can help check soil erosion
- Temperature: Trees can help reduce temperature and increase humidity.
- Education: Tree plantation programs can educate students about the environment and connect them with nature.

Tree Plantation Program

Organized by

Environmental awareness committee

Outcomes:

- Students learned responsibility by caring for the plants, learned how to communicate and compromise with each other.
- Gained leadership skills, and developed self confidence.
- They also developed skills of observation as they watched interactions among plants, animals, soil, and weather
- The more the number of trees are planted, the cleaner the air will get
- To save the endangered environment and to beautify our life.
- The presence of trees encourages the circulation of clean air and aids in the fight against air pollution, which eventually improves student concentration and academic performance.
- Plantations have been used to support forest industry expansion and this objective has often been twinned with the intention of reducing harvesting pressure on native forests

## **TREE PLANTATION**

### **Objectives**

To create green belt and avenues for meeting aesthetic recreational needs to the people.

- Beautify the areas of college campus.
- To reduce the surface run-off discharge and checking soil erosion along the embankments.
- To reduce temperature and increase, humidity.
- To reduce noise pollution to the neighboring household population.
- To reduce the impacts of air pollution and dust as trees and shrubs are known to be natural sink
- For air pollutants. to provide much needed shade on glaring hot roads during summer
- Moderating the effect of wind and incoming radiation.
- To define the ROW especially highlight sharp horizontal curves during night.
- To promote road development as eco friendly activity

## TREE PLANTATION

### Report

Keeping the benefit of trees in mind the Tree plantation programme was initiated by the Popatrao Kisanrao Thorat College Khutbav on 8 Sep 2024. Trees represent life, growth, peace and nature. They produce oxygen, clean soil, prevent drought, control flood related disasters, prevent soil erosion, improve physiological, mental and spiritual health, and also reduce carbon footprints.

The following activities have been undertaken so far to promote this campaign: -

All students were informed about the “tree plantation” through notice to motivate them to plant saplings of trees.

A “Tree Plantation Drive was organized on 8th sep 2024 under by Dr. Rekha Salunke. Mrs. Vikas Dhumal(IQAC Coordinator) asupported the tree sapling plantation drive and motivated the students to take care of the saplings so that they grow into healthy trees.

There is no doubt that the project was successful in Undawadi (Bhosale Wadi). But this was possible only because of the group \*Ek Mitra Ek Vriksha\* . Kisan Waghle, a member of Undwadi, gave this information. Because when this project was started five years ago, there were only acacia trees in this place.

\*Ek Mitra Ek Vriksh\* provided space from Forest in our village for tree plantation and implemented a big and unique concept like \*Birds Juice bar\* here. Meet a lot of support from the village.

Our college students enrolled with our study center was distributed free plants which were planted in the open ground near the ground within the premises of the college. Students were motivated and advised to take care of the plant planted by them. The students also took the Oath: "I will plant a tree and take care of the sapling such that it grows into a mature tree" - On 1st September with the help of our Part-time Academic Counsellors, during each counselling session 5 minutes were contributed to "One Student One Tree Programme".

The students were encouraged to plant tree. All students took for planting tree during their respective counseling sessions. This activity shall be repeated for four weeks during the month of September 2019. - We are planning a small activity related to the theme of "One Student - One Tree" for the July 2024 batch students during the Induction Programme.

We hope that such activities shall sensitize and encourage the students to "Love the trees until their leaves fall off, and then encourage them to try again next year".

## **TREE PLANTATION**

### **Outcomes**

- The sustainable economic development depends on the rational use of environmental resources and minimizing, to the extent possible, adverse environmental impacts through improved project selection and more responsible project planning and design.
- Under this strategy the development must be environmentally sound in the broadest sense. In highway development, environmental planning is concerned with good blending of improvements of physical, social, and economic parameters.
- It involves not only the environmental (land, water, and air) but is also concerned with integration to local, regional and national socio-economic development.
