Subject-Letter of Appreciation ...

Respected Madam,

I would like to personally thank you for your invited talk at Workshop on "Pedogogy and the skills needed to balance teaching, research & services". Organized by our Department of Chemistry on 10/09/2024. Judging from the comments we received, the workshop was very successful. Most of the credit goes to you and you had delivered such an interesting, good and informative presentation.

It's always been our pleasure to have you with us and we look forward to welcome you in future at our institution.

INDUSTRIAL VISIT REPORT

Savitribai Phule Pune
University

Aim: To study production and manufacturing process by visiting an industry in point of view of chemistry.

Day and Date: Thursday, 11th January 2024

Date of visit : 11/01/2024
Time of Arrival : 10:00 AM
Name of Industry : Om Chicks Pvt.Ltd.Khutbav Tal.Daund Dist.Pune
Tal.Dound, Dist.Pune, 411048
Address : A/P Khubav, Tal.Daund, Dist.Pune, 412203

Report:

Bhairavnath Shikshan Mandal's Popatrao Kisanrao Thorat College, Khutbav Department of chemistry had organized one day industrial visit at, Om Chicks Pvt.Ltd.Khutbav for understand the structure and working of an industry, different parts and aspects of an industry. The chemical industry is a widespread business all across the world A chemical plant is an industrial process plant that manufactures (or otherwise processes) chemicals, usually on a large scale. Chemical plants use specialized equipment, units, and technology in the manufacturing process.

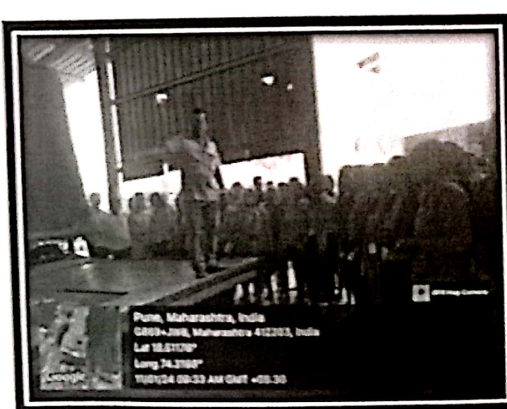

In Om chicks industry there is a production of feed for chicken's .Also numerous chickens were grown in poultry farms for the production of eggs and feeds.

After reaching industry teacher made groups of students and take us inside of production house to see actual process of production, different manufacturing machineries etc. There also Mr.Rajudada Torat explains how manufacturing is done.

Total 53 Students of B.Sc. Chemistry of Popatravo Kisanrav Thorat College, Khutbav with HOD Prof. Archana Memane, Prof. Y.B. Divekar, Prof.S.N.Sayed & S.H.Lavhe visit this industry.

This visit helpful for student to be aware about the practical work of a particular industry, and different things required for an industry.

Some photos during Industrial Visit.

Manufacturing, Production, Packaging:

Poultry feed production is generally divided into the following steps: receiving and cleaning of feed ingredients, crushing of raw materials, batching, mixing, pelletizing and packaging of finished feed.

1. **Raw material cleaning:** It is a good production practice to clean poultry feed before starting processing. This cleaning machine can be used to clean the premix at the inlet. This can be premixed by sieving effect or pressure cleaning.
2. **Crushing:** In the processing of poultry feed, some raw materials must be grinded to the required grain size for various feeds. That is the work of the grinding machine on the line.
3. **Mixing:** The mixer is used to mix various raw materials used in poultry feed formulations. Here, the different raw materials used in the poultry feed formulation are mixed with additives and supplements, oils or fats and drugs. A good mixer will ensure that the highest quality standards are adhered to.
4. **Pelletizing:** Many people who buy poultry feed pelletizes make the mistake of thinking it is a complete poultry feed processing unit. The poultry feed pellet machine only does the pelleting work to make the poultry feed more suitable for chicken. Its job is to produce the final pellet feed after all additives, feed supplements are drunk, mixed and added. Having good pellet means giving the chicken "complete feed", and a good feed factory ensures the best conversion rate.
5. **Screening, cooling and packaging:** after granulating, compound feed was screened to remove debris and powder, as well as cooled down temperature and moisture, and then stored after packaging. The slag and powder are returned to process.
